2.5 Review

- *Eulerian* – description from the perspective of fixed points within a reference frame.

- *Lagrangian* – description from the perspective of a parcel moving within the flow.

- *Streamline* – Eulerian, tangent line to instantaneous velocity field.

- *Pathline* – Lagrangian, path of a fluid parcel.

- *Streakline* – Locus of parcels that have passed through a given point.

- Pressure is a scalar - independent of direction.
